U.P. Engineering is a small independent engineering company that specializes in civil engineering, including surveying, civil-site & civil-structural engineering. We provide a hands-on approach and will take your needs and project seriously. Whether it be identifying property lines, inspecting structural conditions of your home or helping you layout a new building site, we are the engineering team you can count on no matter the size!

### More about us:

U.P. Engineering was established in 2016 with a group of two motivated engineers. We have started with taking small independent projects, but have grown in the last couple years to doing more sizable projects with the employment of two more staff members. We have been successful these last few years by being able to take the time and care that smaller projects need that larger companies can't afford to do. We strongly believe that you will be very happy with our professionalism, experience and motivation to help you make your project a reality!
